ACTION ITEMS:

Agenda

- Orientation to project and code
- Review of critical issues

Meeting Materials

- [Project Page](#)
-

Notes

Export/Import

- view an exhibit
- name in header exhibit dashboard
- General tab (on left)
- Export tab (on top)
- Same process to import into local using Import tab

Branches:

- documentation needs to stay
- portal-ingest may be fully merged and represents partial ingest of external material from digital collections portal which has its own IIIF

No tests

Most important thing to know...

- people using it which is driving the need to update

Upload is not a priority of the community

- not using spreadsheet upload
- not using RIIIF to generate IIIF

Removing a widget breaks an exhibit page in unpredictable ways

Options for Upload Process

- one by one through Items tab on dashboard for the exhibit
- some try a spreadsheet upload (sample spreadsheet in the dashboard)
 - images in an AWS bucket
 - supposed to get an email when done
 - ingest seems to be broken
- digital collection upload
 - not being used because of thumbnail issue

Attendees

- Lynette Rayle
- Jenn Colt
- Melissa Wallace

Absent
