

DeScribe

Overview

Used for [NanoScribe](#) print job preparation.

The DeScribe STL import wizard prepares a three-dimensional CAD model for printing with field-proven software recipes. Users can also develop and retrieve their own individual and application-specific recipes to customize print jobs at any time. When the printing parameters are set, a preview of the design is available in 3D. Users can even simulate the printing process in 3D.

Accessing

Cleanroom

DeScribe is available on the NanoScribe computer in the cleanroom.

Windows GPU Conversion Computer

DeScribe is available on the [CNF 3D GPU conversion computer](#) accessed via Remote Desktop.

Own Computer

DeScribe can also be installed on your own Windows computer. Contact the [NanoScribe](#) tool managers to obtain a free license.
