

# Data import administration

Deprecated. Current page: Designing data import profiles in FOLIO

Creation of data import profiles happens in the data import settings. These settings are available to a limited number of LTS staff.

Creating profiles: <https://wiki.folio.org/display/FOLIOTips/2-Creating+and+using+profiles>

Mapping EDIFACT: <https://wiki.folio.org/display/FOLIOTips/Field+mapping+syntax+for+EDIFACT+files>

Understanding MARC and other mappings can be an important part of successfully administering data import and export: <https://wiki.folio.org/display/FOLIOTips/MARC+Mappings+Information>
