

VPN for GuestIDs

Overview

Because of persistent threats leveraged against higher ed academic institutions, CNF and Cornell require a VPN connection to access many on-campus services. Cornell uses two differing VPN clients... Cisco Anyconnect for those with a Cornell NetID; **FortiClient** for those with a **Cornell GuestID**.

Updating

The FortiClient VPN software does not auto update. CNF will periodically send out communications when a new version is available, and users should update to the new version at that point.

Installing

Installation instructions are available on the [IT@Cornell GuestID VPN webpage](#).

Configuring

Again, follow the instructions on the [IT@Cornell GuestID VPN webpage](#). Additional needed information is below:

RS-CNF-VPN-GID

- Remote Gateway: <https://guestid.cuvpn.cornell.edu/RS-CNF-VPN-GID>
- Username: <Your GuestID Here>@RS-CNF-VPN-GID

RS-CNF-VPN-Thin

- Remote Gateway: <https://guestid.cuvpn.cornell.edu/RS-CNF-VPN-Thin>
- Username: <Your GuestID Here>@RS-CNF-VPN-Thin
