

srs_marctab record version

There are multiple versions of records in the srs_marctab table in the CUL LDP. The correct version is called ACTUAL. Here is an example of how you might specify getting the ACTUAL version.

```
language_extract AS (  
SELECT  
    sm.instance_id AS instance_id,  
    substring(sm.content, 36,3) AS LANGUAGE,  
    sr.state,  
    sr.id  
FROM srs_marctab AS sm  
LEFT JOIN srs_records AS sr on sr.id = sm.srs_id  
WHERE  
    sm.field = '008'  
AND sr.state = 'ACTUAL'
```
