

DBeaver Tips and Tricks

[DBeaver User Guide](#)

How do I restore my view of Navigator, Projects, and the SQL Editor?

It is easy to accidentally close these views without a clear way to restore them. To restore them quickly, choose Window/Open Perspective/Other/DBeaver (default)

How do I restore the column headers (e.g., Name, Database, Modified date) to the Scripts list?

From the Windows dropdown menu, choose "Project Explorer." The column headers reappear.
