

Inventory: Item records

Item records usually represent one physical, circulate-able unit. The item record is where the barcode, material type, loan type, and current item status are stored.

Guide to local field usage in item records (pdf)

Create a New Item Record

Preconditions: Existing Instance and Holdings Record in Inventory

Steps

1. Navigate to the desired Instance record in Inventory; the selected record will be displayed in the right pane
2. Choose the appropriate Holdings record and select "Add Item"
3. Fill in required and other relevant fields
 - a. Required: Material type (in *Item data* section), Permanent Loan Type (in *Loan and availability* section)
4. Select "Save and close" in the lower right

Expected Result:

New item displays with the associated Holdings in the right pane

Edit an Existing Item Record

Steps

1. View the item record by clicking on the barcode field (either the barcode itself or the text "no barcode")
2. From the Actions menu in the upper right, select "Edit"
3. Make desired changes
4. As soon as you make any changes to the item, the "Save and close" button in the lower right corner will become active. Select "Save and close" to save your changes.

Delete an Item Record

Items with some statuses (such as checked out) cannot be deleted. FOLIO will display an error message (as illustrated) and will not allow the deletion.

If an item has no dependencies (i.e., relationships to other records), it is easily deleted.

Item records must first be suppressed before they are deleted. (This ensures the change occurs correctly in the public catalog.) Before following the steps below, suppress the item and either wait a minute or two.

Steps

1. View the item record by clicking on the barcode field (either the barcode itself or the text "no barcode")
2. From the Actions menu in the upper right, select "Delete"
3. Select "Delete" again to confirm the deletion

Confirm deletion of item

Item HRID 10067883 with barcode xx is checked out and can not be deleted until checked in again, and item status is 'Available'

Confirm deletion of item

Item HRID **10067883**, barcode **xx** has no dependencies and will be **deleted**.

CancelDelete

Reorder Item Records

As of Iris release there is no way to change the default/stored order of item records within a holdings record. You can, however, change the display order temporarily by sorting.

Sort by the values in any displayed column by clicking on the column header.

For example, sort by status, click on the word "Status"

Future functionality (manually changed the order items are stored) is described in <https://issues.folio.org/browse/UXPROD-1625>

Default display:

Instance record unspecified

Move (Relink) Item Records from One Holdings Record to Another

Preconditions: Holdings and Item records already exist in Inventory

Move Items Within the same Instance

Preconditions: Instance record exists with more than one associated Holdings record

Steps:

- Navigate to the Instance record
- In the "Actions" menu in the upper right, select "Move items within an instance"
- The display will change, with check boxes appearing to the left of each item (the Holdings accordion needs to be expanded)
- Select the item(s) you wish to move
- Select "Move to" and then select the Holdings record **OR**
- Drag and drop the item(s) you have selected

101 essays I don't have time to write : on umbrellas and sword fights and theater / Sarah Ruhl.

Holdings: Olin > prefix2 call number2 suffix2

View holdings Add item

Item: barcode ^	Status	Copy number	Loan type	Effective location
barcode3	Available	-	Non-circulating	Olin
Item2move	Available	-	Circulating	Olin

Holdings: Olin Reference > prefix call number suffix

View holdings Add item

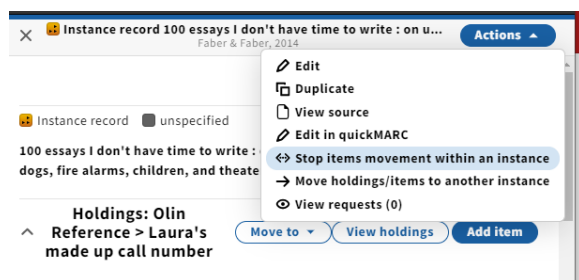

Item: barcode ^	Status	Copy number	Loan type	Effective location
barcode1	Available	-	Non-circulating	Olin Reference

Add holdings

Expected results:

Item record displays with the Holdings to which it has moved; its effective location and call number reflect that holdings

Note: Once you have activated the ability to move items, an additional option will appear in the Actions menu—Stop items movement within an instance. This will change the display back to the usual view, but will not undo any item movement you have initiated.

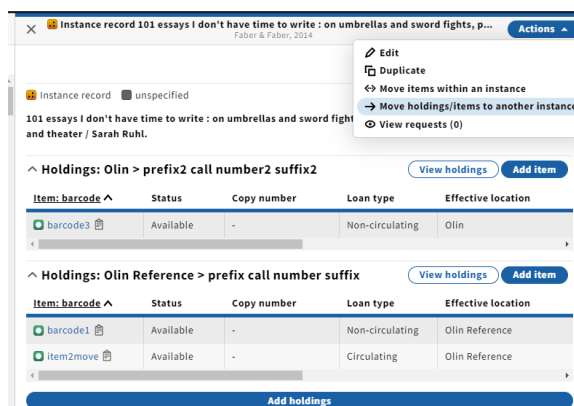

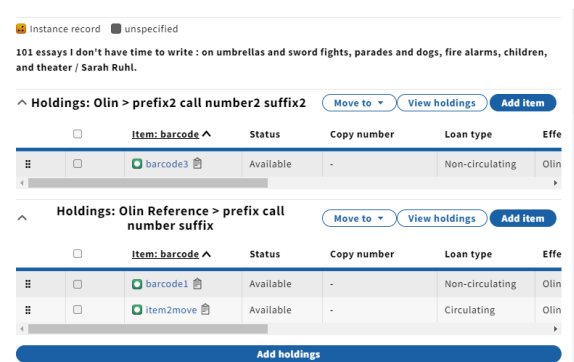

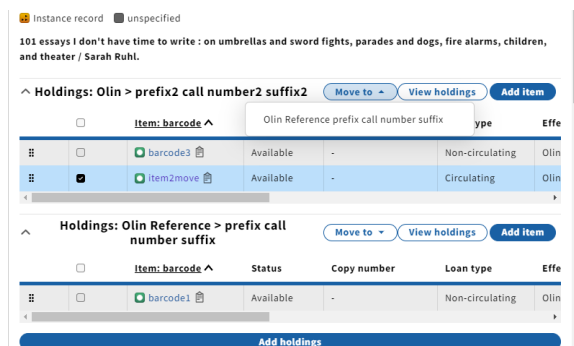

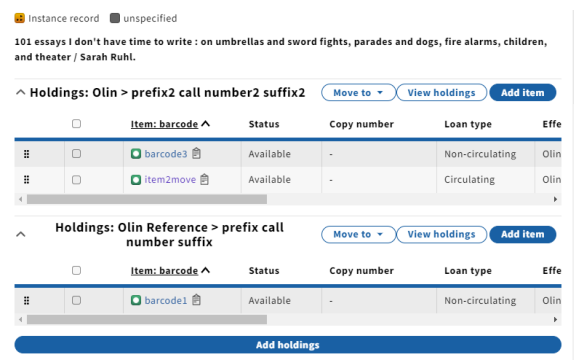

Move Items between two different Instance records

Preconditions: a Holdings record exists on the Instance the Items will be moved to

Steps:

1. Navigate to the Instance record with the Item(s) you wish to move
2. In the "Actions" menu in the upper right, select "Move holdings /items to another instance"
3. A search dialog box opens; the search menu has the same options as the regular Inventory search. (For example, you can search by hrid or by barcode)
4. Search for and select the Instance record you wish to move Item(s) to
5. The records will display side-by-side with checkboxes enabled
6. Select the Item record(s) to be moved; to select all items associated with a Holdings record choose the box just above the blue line, next to the text "Item: barcode"
7. Select "Move to" and then select the desired Holdings record **OR**
8. Drag and drop the Item record(s) over to the desired Holdings record
9. Check the confirmation message to make sure you've selected the correct record
10. Click "Continue"
11. A green success "toast" will appear briefly

Expected results:

Item(s) that have been moved will display with the Holdings record(s) to which they have been moved, along with the associated effective location and call number. They will no longer display with the Holdings record from which they were removed.

The screenshot shows a library catalog interface with two tabs. The left tab, titled 'Holdings: Olin > prefix call number2 suffix2', displays a table of holdings. The right tab, titled 'Holdings: Olin Reference > Laura's made up call number', displays a table of holdings. A 'Confirm move' dialog box is open, showing the item being moved from the left tab to the right tab. The dialog box contains the text '1 item will be moved to Olin Reference Laura's made up call number' and buttons for 'Cancel' and 'Continue'.

Holdings: Olin > prefix call number2 suffix2

Item barcode	Status	Copy number	Loan type	Eff
barcode1	Available	-	Non-circulating	Olin

Holdings: Olin Reference > Laura's made up call number

Item barcode	Status	Copy number	Loan type	Eff
barcode2	Available	-	Circulating	Olin
Item2move	Available	-	Circulating	Olin
No barcode	Available	-	Reserves	Olin

Confirm move

1 item will be moved to Olin Reference Laura's made up call number

[Cancel](#) [Continue](#)

Item Statuses

Many item statuses are assigned by FOLIO based on specific actions and cannot be assigned or changed manually through the user interface. For example, an item with status Checked out must be checked in for the status to change.

All possible item status values (comprehensive list - we may not be using all of these):

The screenshot shows a dropdown menu with the following item statuses: Aged to lost, Available, Awaiting delivery, Awaiting pickup, Checked out, and Claimed returned. The 'Awaiting delivery' status is highlighted with a blue border.

- Aged to lost
- Available
- Awaiting delivery
- Awaiting pickup
- Checked out
- Claimed returned
