

Luna 6.0 Test Group

Team:

- Greta Bahnmann
- Mira Basara
- Kalia Bussert
- Danielle Mericle
- Liz Muller
- Margaret Webster
- Matt Conway

Test Link : <http://lunadev.library.cornell.edu/luna/servlet>

Target:

- Weigh pros/cons- write brief document by Jan 09
- Determine plan by Jan 09
- IF we implement, do so in Summer 09
- Conduct usability tests over Sprint 09 semester

Goals:

Develop plan to test the following in Luna 6.0:

- Functions in Luna 6.0, including but not limited to:
 - Creating groups
 - Sharing groups
 - Exporting presentations
 - Browsing & Searching
 - Cross-platform functionality (Mac vs. PC)
 - Migrating Presentations & Personal Collections
- Cross Collection Searching
- Federated Searching (webfeat)
- Authentication
- Java Client

Tasks:

- Come up with list of Collections to test: *KB & GB will send to Surinder*
- Develop scenarios (based on content) for cross-collection searches. *KB & GB*
- Develop scenarios (based on platform) for general Luna 6.0 testing. *KB?*
- Investigate authentication issues
- Investigate Flickr component

Known Issues:

- Personal collections will not be supported in 6.0.
- Flickr collections must be public not private
- Presentations will not migrate to 6.0, but groups will. Faculty have to rebuild presentations if they want to go with 6.0.
- Annotations will not work in 6.0.

Issues discovered through initial testing:*

- Errors: creating and sharing groups; viewing image captions (check to see if fixed after reload of 6.0); exporting groups (varying image size, metadata transfer, etc)
- Cross-collection searching issues:
 - plural vs. singular searches yield inconsistent results
 - keyword search didn't work for dates
 - picks up invisible data not visible in data record

- lower case vs. upper case searches yield inconsistent results
 - advanced searching resulted in errors with key word search
- Usability issues
 - Cannot pull images into Luna from Desktop (only through Flickr account)
 - Flickr account must be public
 - Embed: html version didn't work (java did)
 - Presentation tool not intuitive at all (easy to get locked)

Tasks

Task List	
▼	<input type="checkbox"/> Come up with three queries for cross-collection searches-- EVERYONE
▼	<input type="checkbox"/> Contact Rick regarding Authentication issues- Danielle & Mira
▼	<input type="checkbox"/> Investigate Security Issues- MB & Rick
▼	<input type="checkbox"/> Investigate issues with "categories"-- Mira
▼	<input type="checkbox"/> Investigate issues with pulling in other collections – Mira
▼	<input type="checkbox"/> Mac & PC/ Firefox & Chrome-- Susette
▼	<input type="checkbox"/> Mac / Safari & IE 6.0 testing- Danielle
▼	<input type="checkbox"/> PC/ IE & Firefox testing/ Greta & Margaret
▼	<input type="checkbox"/> PC/ Internet Explorer 6.0 testing-- Matt Conway
▼	<input type="checkbox"/> PC-Vista / IE & Firefox testing-- Mira
▼	<input type="checkbox"/> Test Presentation, Embed, and Flicker functionalities-- EVERYONE
▼	<input type="checkbox"/> Test for inconsistencies in search results-- EVERYONE
