Midterm Wiki Update

Midterm Wiki Report

The midterm assignment is to update your team's wiki pages and for each individual to write a paragraph documenting their contribution to the AguaClara project.

Individual Assignment

Complete the Wiki Report Individual Contribution page as is described at this link.

Team Assignment

The links below lead to information regarding wiki formatting. Read through the set of instructions for your team carefully and be sure that your wiki pages are set up correctly and that they contain the right information.

- Research Team Wiki Page Organization
- Design Team Wiki Page Organization
- Outreach Team Wiki Page Organization

There are also links on the Team Member Resources page to guidelines on graph use, report syntax, and more.

Submission

Once complete, email your team leader with links to any pages that are in wiki-type and attach any posted word documents directly to the email.

Grading

Most subteams already have a wiki space set up. Your grade will depend on your team's ability to update that space and keep current information and images on it. A **significant** portion of your grade is based on formatting because improper formatting causes valuable information to get lost on a team of this size. It is also important to portray a professional image and having inconsistent formatting hinders that.

After reviewing the pertinent wiki pages and documents, each team will be given feedback about their semester progress. It will indicate what, if any, areas of your wiki space needs to be worked on further. The grade will be based on the content of your wiki report, the team's progress/apparent effort as it relates to your semester goals, your individual contribution explanation, and your ability to follow the wiki organization guidelines.
