

2008-06 June - Center for Advanced Computing

Monday, June 23, 2008, noon - 1:00 p.m. 703 Olin Library

Center for Advanced Computing
Dave Lifka

Oya's original message about the topic:

Dear DLIT Colleagues,

I invited Dave Lifka to join our June Developers' Forum - [June 23 noon-1pm at 703 Olin Library](#). Dave is the director of the [Center for Advanced Computing](#). His group has an important role in the Cornell cyberinfrastructure development efforts. I asked him to assess the general landscape of high-performance computing at Cornell and also talk about the services and consultancies provided by his group. This will be a casual conversation so let's be prepared to give him some highlights from our program. As we explore the Library's role in cyberinfrastructure initiatives, it will be great to get a better sense of what CAC offers.

If you are planning to join the session and are not familiar with cyber-issues, you may want to browse through one of the following reports:

Cyberinfrastructure, Data, and Libraries,

<http://www.dlib.org/dlib/september07/gold/09gold-pt1.html>

Cyberinfrastructure Technology Watch, August 2007 Issue: <http://www.ctwatch.org/quarterly/archives/august-2007>

National Science Foundation, Revolutionizing Science and Engineering through Cyberinfrastructure: <http://www.nsf.gov/cise/sci/reports/atkins.pdf>.

Our Cultural Commonwealth: <http://www.acls.org/cyberinfrastructure/OurCulturalCommonwealth.pdf>

You'll receive a meeting reminder from Mary Beth with RSVP request as this will be a meeting with lunch provided.

Best, Oya
